

14. | Write a code using RAW sockets to implement packet sniffing.

AIM: To write a Python program using RAW sockets to implement packet sniffing, capturing IP packets and displaying their source IP address and packet size.

packet_sniffer.py

```
import socket

HOST = socket.gethostname(socket.gethostname())

sniffer = socket.socket(socket.AF_INET, socket.SOCK_RAW, socket.IPPROTO_IP)
sniffer.bind((HOST, 0))
sniffer.setsockopt(socket.IPPROTO_IP, socket.IP_HDRINCL, 1)

print("Packet Sniffer Started")
print("Listening on:", HOST)
print("Press Ctrl+C to stop")

try:
    while True:
        data, address = sniffer.recvfrom(65535)
        print("Source IP:", address[0])
        print("Packet Size:", len(data), "bytes")
        print("-" * 40)

except KeyboardInterrupt:
    print("\nPacket Sniffer Stopped")

finally:
    sniffer.close()
```
